Our **FOCUS** is the provision of quality, software and customized solutions related to operating systems, messaging and workflow applications, office productivity applications, Security and Storage, Convergence and Disaster Recovery solution.

Our **CORE COMPETENCIES** are providing IT Consultancy, high-end IT Solutions, design, Integration and deployment of applications based on Windows operating systems, productivity and high availability messaging applications, Virtualization, Security solutions such as Firewall, Intrusion detection system, Web-security, Web Designing & Development, Anti-virus, storage and high end availability solutions coupled with Disaster recovery solutions.

Our **CONCERNS**, first, last and always, are client satisfaction through quality of deliverables and adherence to deadlines.

The Management is committed to continually improve the effectiveness of the Quality Management System, adopted and implemented throughout the organisation, to enhance customer satisfaction, by involvement of all members of the organisation.

THE GENESIS

Today. The age of the Internet. Where technology changes by the nanosecond. Where IT skills are a must-have survival tool

Micron Solutions, headquartered in New Delhi, is a premier Solution Provider Company is in the business of IT Consluting, Solutions, Services & Support, implementing packaged software and related business solutions. The Company is committed to transforming challenges to opportunities. Micron Solutions Pvt. Ltd is one of the fastest growing companies in its field. Its rise has been fueled by various partnerships with world leaders in technology like Microsoft, Symantec, IBM, Dell, HP, et al. Our alliance with leading technology companies represents a tremendous opportunity for our customers and business partners.

At **Micron Solutions**, we ensure that our engineers understand the 'who' and 'why' behind not only our processes but also our values. We offer our customers expertise to manage and maintain their processes with effective and innovative solutions.

Micron Solutions has gained enormous experience over the years by offering a wide range of business services and solutions to customers, including several MNC's, Indian Corporate and overseas. The cumulative experience that the organization has gained has helped us develop deep understanding of businesses and close relationships with our clients. We seek to leverage our hands-on business and technology experience and expertise to offer management solutions to clients.

Being essentially a Solutions Provider Company, rather than a pure trading company, our strengths lie in the great amount of value-addition we provide to our customers, in the form of high-quality implementation, training, customization and support.

Our strong management processes ensure that orders are executed efficiently and in a professional manner, and client deadlines are routinely met. Our experts can simulate customized capacity, performance and security tests to diagnose problem areas before they can surface in a live environment. We recommend the software and hardware requirements your system would need to support predicted activity levels.
